

Installation Guide

1. Install node from
<https://nodejs.org/en/>
Node v12.13.1
 2. Install xampp from
<https://www.apachefriends.org/index.html>
Xampp v3.2.4
 3. Unzip the main folder
Copy the Peralejo.sql file in the folder into the xampp directory
 4. Start xampp control
start the mysql server
click the shell icon in the xampp control
or open your terminal in the xampp directory
 5. Input these 2 commands in the terminal:
mysql -u root
source peralejo.sql
You may exit the terminal
- Steps 3-5 executes the queries in peralejo.sql into the database
These steps can be substituted by using other methods such as through phpMyAdmin if the user is familiar with them.
6. Open the terminal in the main folder
type the command in the terminal:
node app.js
 7. Open any browser
navigate to <http://localhost:5000>
